

# Architectural Design

## Activity 5

### Situation

Architects draw blueprints to clearly illustrate plans for construction houses, roads, buildings. These plans are detailed and include all the specifications necessary for the professionals who will construct the product.

### Problem

Use the plans provided, main floor, electrical plan and foundation plan, to complete the following chart to help you become familiar with and recognize the technical drawing language used to create blueprints for architectural design.

### Specifications

- Print a copy of the chart provided to record the information necessary to complete this activity.
- Include the chart in your portfolio for marking.
